CONFERENCSEY

WEB SITE USER GUIDE

2021S1_JUNE_WD_01

Table of Contents

1. Introduction

SLIIT is organizing an academic conference where researchers present results, workshops, and other activities. It is named "International Conference on Application Frameworks" – ICAF. Here, researchers will present their latest findings and implementations of different programming languages including Java, JavaScript,Python, ... Conference will be physically held at SLIIT. Only registered participants can attend the event.

a. About site

This site is useful for researchers to register and get a chance to present their ideas, and findings to the audience. Other than that attendees can directly register to the conference to participate that. There is separate sections to do the payments and upload documents.

b. Contact details

Email : teamabhiru@gmail.com
Contact : 0769036197

c. Who are the users

This web site can use mainly four different users they are,

    i. Administrator
    ii. Editor
    iii. Reviewer
    iv. User

User will divide to different three catogoryies

    i. Attendee
    ii. Researcher
   iii. Workshop presenter

2. Used technologies

To develop the website used JavaScript technology. In deeply here used react library for building user interfaces. Used node js for the backend development process and the database is set up by using the mongodb cloud database system.

There used "heroku". It is a container-based cloud Platform as a Service (PaaS). By using that can deploy, manage, and scale modern apps. That platform is elegant, flexible, and easy to use, offering developers the simplest path to getting apps to market.

3. How to register

Users need to provide a user name, password, and email. If the registering person is researcher or workshop presenter need to upload their documents. Attendee need to do payment when registering to the system.

Image 1 Registration Form

a. Pre requirements
